COMMITMENT

Dedicated final-semester Civil Engineering student with specialized expertise in GIS Mapping, Data Analytics, Structural Modeling, and Geotechnical Analysis. Experienced in high-stakes Logistical Planning and Team Coordination through extensive leadership roles. Eager to contribute to design, drafting, and project development in a professional setting, with the ambition to grow into an Entry Level Engineer at a leading Design and Build firm.

RESEARCH AND PROFESSIONAL EXPERIENCE

Research Cohort Member — **Current**

Kathmandu Geo Lab

- Conducting research on Shear Wave Velocity (V_s) prediction using Machine Learning models for enhanced seismic hazard assessment.
- Utilizing advanced data analysis techniques to integrate geological, geotechnical, and geographical data for predictive modeling.

Research Wing Correspondent — **Jul 2025 – Present**

CESS-Nepal

- Fostered a culture of evidence-based decision-making by guiding peers in research methodologies and report generation.
- Supported students in presenting and publishing their research in civil engineering.
- Organized a **15-day Machine Learning & AI Workshop** for civil engineering students, reinforcing organizational skills and promoting modern computational tools in civil engineering practice.

Vice President — **Dec 2024 – Dec 2025**

MAPS Pulchowk (Mathematics and Physics Society)

- Directed and managed large-scale academic events, including the Integration Bee, engaging over 500 student participants.
- Demonstrated strong team coordination and organizational capacity in hosting institution-wide Olympiads and technical talks.

Event Coordinator — **Nov 2024 – Jan 2025**

Civil Engineering Hackathon (CESS Nepal)

- Designed and led the first Civil Engineering Hackathon to promote the use of programming tools for optimizing design precision.
- Bridged the gap between civil engineering and programming, modeling the integration of technology with core principles.

IOE Entrance Mentor — **2021 – Present**

Clamphook Academy

- Prepared over 2,000 students annually, honing strong communication and simplified teaching skills vital for technical outreach.

RELEVANT SKILLS

Technical Skills for Assessment & Planning:

- **Geospatial Analysis (GIS):** Proficient in ArcGIS, SWAT, and Google Earth Engine for mapping, site surveying, and resource allocation.

- **Modeling & Design:** AutoCAD, Revit, HEC-RAS, PLAXIS, OpenSees, and Python-based FEA for structural and geotechnical analysis.
- **Data Analytics:** Practical experience with Python (for data processing/predictive modeling), C programming, and Advanced Ms-Excel.

Leadership and Volunteer Experience:

- **Nepal Scout (2014 – 2019):** Extensive background in community development, demonstrating discipline and social commitment.
- **Hult Prize Startup Mentor:** Focused on creating sustainable, scalable business models for social challenges.
- **Soft Skills:** Adaptability, Team Coordination, Logistical Planning, Analytical Skills.

PROJECTS DEMONSTRATING APPLICABLE EXPERTISE

- **Site Response Analysis for Kathmandu Valley (Final Year Project):** Performing 1D and 2D site response analysis for the Kathmandu Valley using PLAXIS and OpenSees. Investigating local soil amplification effects and ground motion characteristics to support seismic-resilient design in the region.
- **WorldLink CSR – Rural Toilet Design & Build (Proposal Accepted):** Preparing for the design and construction of a toilet facility in a rural community as part of a CSR initiative. Responsible for site planning, structural layout, and material estimation, demonstrating practical Design and Build capability and teamwork.
- **Structural Health Monitoring (SHM):** Developed analysis for structural health monitoring, including anomaly detection, relevant for post-damage structural integrity checks.
- **Accident Data Analysis in Kathmandu:** Utilized Python to analyze municipal data and identify trends—methodology transferable to property loss assessment.
- **Flood Mapping of Karnali River:** Ongoing project utilizing GIS software and Python for environmental modeling.

CERTIFICATIONS AND TRAINING

- **Autodesk Certified Professional: AutoCAD for Design and Drafting Exam Prep** — Coursera — 2023
- **REVIT Workshop** — CESS-Nepal — 2024
- **From Scratch to Structure: A Complete Building Design and Analysis Workshop** — CESS-Nepal — 2024
- **Flood Hazard and Exposure Mapping** — 2025
- **Software Fellowship** — LOCUS — 2025
- **Research Colloquium Sub-Coordinator** — CESS-Nepal — 2025
- **Civil Engineering Hackathon Coordination** — CESS-Nepal — 2025
- **Machine Learning and Python Workshop** — CESS-Nepal — 2026
- **Geomandu Geotechnical Model Competition – Winner Mentor** — 2026

EDUCATION

Bachelor in Civil Engineering ***2021 – Present***
IOE Pulchowk Campus, Institute of Engineering (IoE), TU
Pulchowk, Lalitpur

- **Eighth Semester (Final Semester)** – All previous semesters cleared with no back-papers.

+2 Science ***2019 – 2021***
SOS Hermann Gmeiner Secondary School
Bharatpur

- **GPA 3.78/4.0**
